

Onboarding View

This view is shown to users if it is their first time opening the app for the current version. It highlights some of the main features of the app in a nice and easy to use UI (by swiping to go to the next feature).

Login/Signup View

After the user completes the onboarding tutorial, they are presented with a login view. The user can login with an existing account, reset their password, or register for a new account.

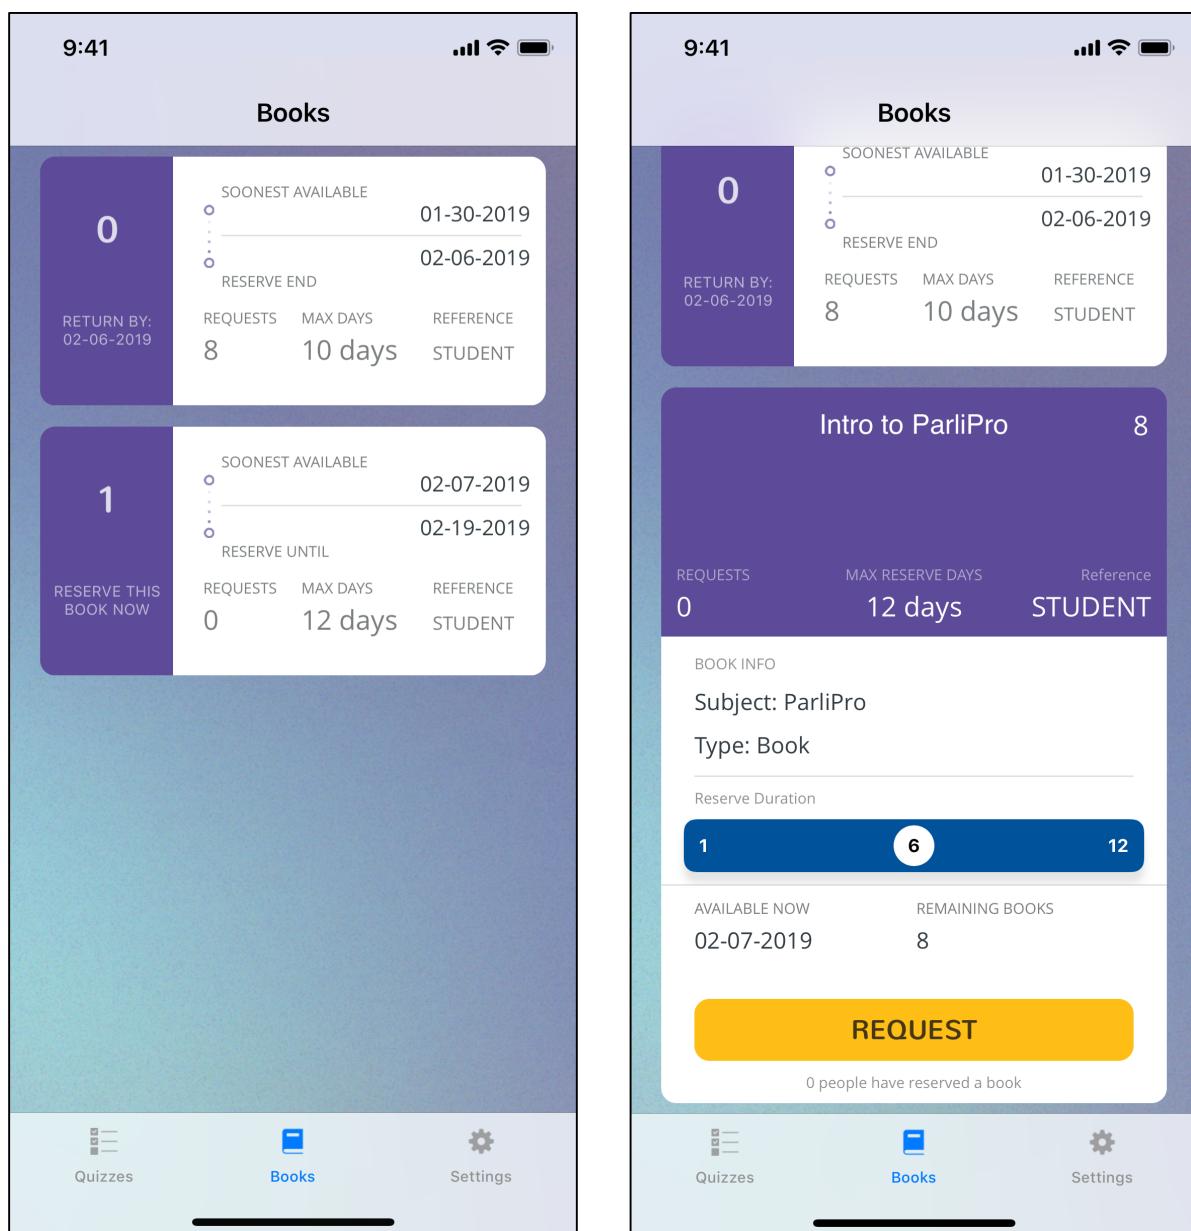

Quiz View

Once the user is logged in (or they open the app prior to already being authenticated) they will be brought to the home view, which is also the quiz category selector view. The user can select their subject then enter the quiz view to answer the questions.

The image displays two screenshots of a mobile application interface, likely for a quiz or educational app. The left screenshot shows the main menu or home screen. The title "Quizzes" is at the top, followed by a blue button labeled "Leaderboards". Below this is a descriptive text block: "Quiz your knowledge over different aspects of FBLA. This app can help you learn more about FBLA, with that extra knowledge you can get the most out of FBLA." Below this are four red rounded rectangular buttons with white text: "Competitive Events", "Business Skills", "Sponsors/Partners", and "Simple ParliPro". At the bottom is a navigation bar with three icons: "Quizzes" (selected), "Books", and "Settings". The right screenshot shows a quiz question. At the top, it says "9:41" and has signal, Wi-Fi, and battery icons. Below this is a question card with a blue header showing "1/5". The question text is: "In 1940, what national council sponsored the proposed student organization naming it the Future Business Leaders of America?". Below the question are four blue rounded rectangular buttons with white text, representing answer choices: "Council for Highschooler Businesses", "The National Council for Business Education", "National Business Education Association", and "National Organization for Students".

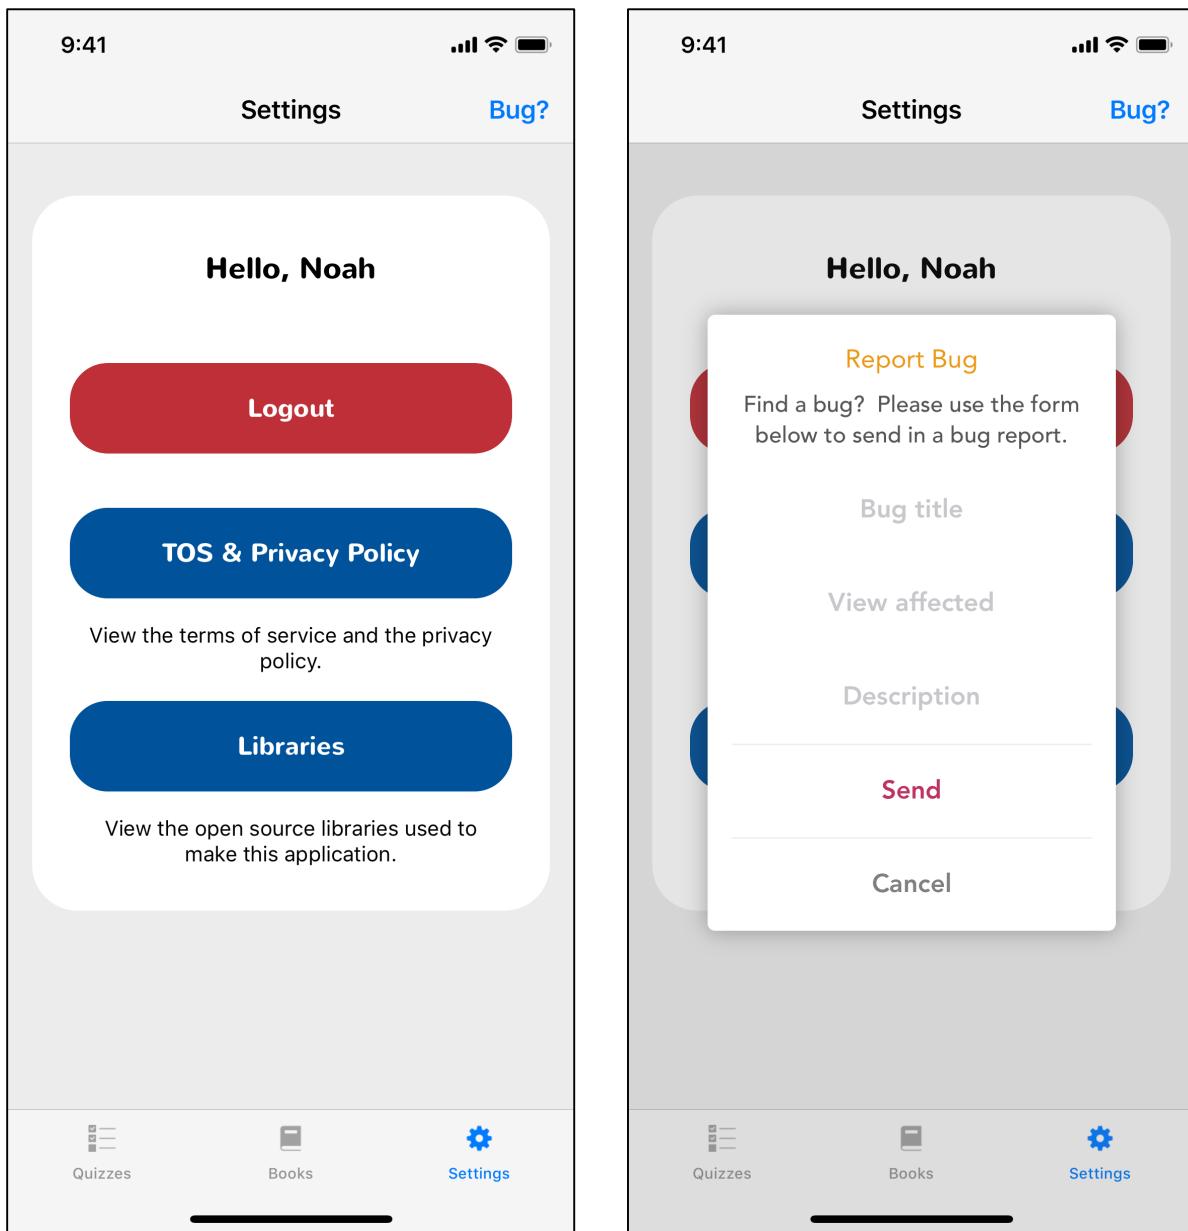

Book View

When the user first visits the book view, they can view all the books that are currently registered in the database. If you look at the picture on the left, you can see that the user has already reserved the first book (the return date is shown as well). The view on the left portrays what the view looks like after a user selects a book. The slider and the request button are not greyed out because the user can reserve this book (if they haven't already and there are enough books available).

Settings View

Need to logout, report a bug, or check the terms and libraries used? The settings view can help you with that. The settings view shows the current user's name along with an option to logout. The image on the right shows what the bug reporting process looks like.

Terms of Service and Privacy Policy View

Terms of Service and Privacy Policy are very important to the app and to some users questioning how the app handles their data. We have both of these easily available for users who are curious. The Terms of Service are displayed at the top and the Privacy Policy is available to see immediately following the Terms of Service (Terms and Conditions).

The image consists of two side-by-side screenshots of a mobile application interface. Both screenshots show a header with a back arrow, the text "Settings", and "TOS & Privacy". The left screenshot shows the "Terms & Conditions" section, which contains a detailed text about app usage rules and intellectual property rights. The right screenshot shows the "Privacy Policy" section, which contains a general statement about the app's purpose and a detailed policy regarding personal information collection and use.

Privacy Policy

Noah Holoubek built the Down to Business app as an open source app. This SERVICE is provided by Noah Holoubek at no cost and is intended for use as is.

This page is used to inform visitors regarding my policies with the collection, use, and disclosure of Personal Information if anyone decided to use my Service.

If you choose to use my Service, then you agree to the collection and use of information in relation to this policy. The Personal Information that I collect is used for providing and improving the Service. I will not use or share your information with anyone except as described in this Privacy Policy.

The terms used in this Privacy Policy have

Libraries View

This app wouldn't be possible without the help from some awesome open sourced code. These libraries/dependencies were incorporated into the app you are viewing screenshots of now. You can view what the name of the dependency is, who created it, where it is used in the app, and what open source service you can locate the code or images at.
